# Land acknowledgment

---

Even meeting in a virtual environment, we would like to acknowledge the Indigenous Peoples of all the lands that we may be separately on today. We do this to reaffirm our commitment to and responsibility for improving relationships among nations, and to improving our own understanding of local Indigenous peoples—the Haudenosaunee and the Anishinabeg—and cultures.

(Inspired by [A guide to acknowledging First Peoples and traditional land.](#))

# Expectations have changed

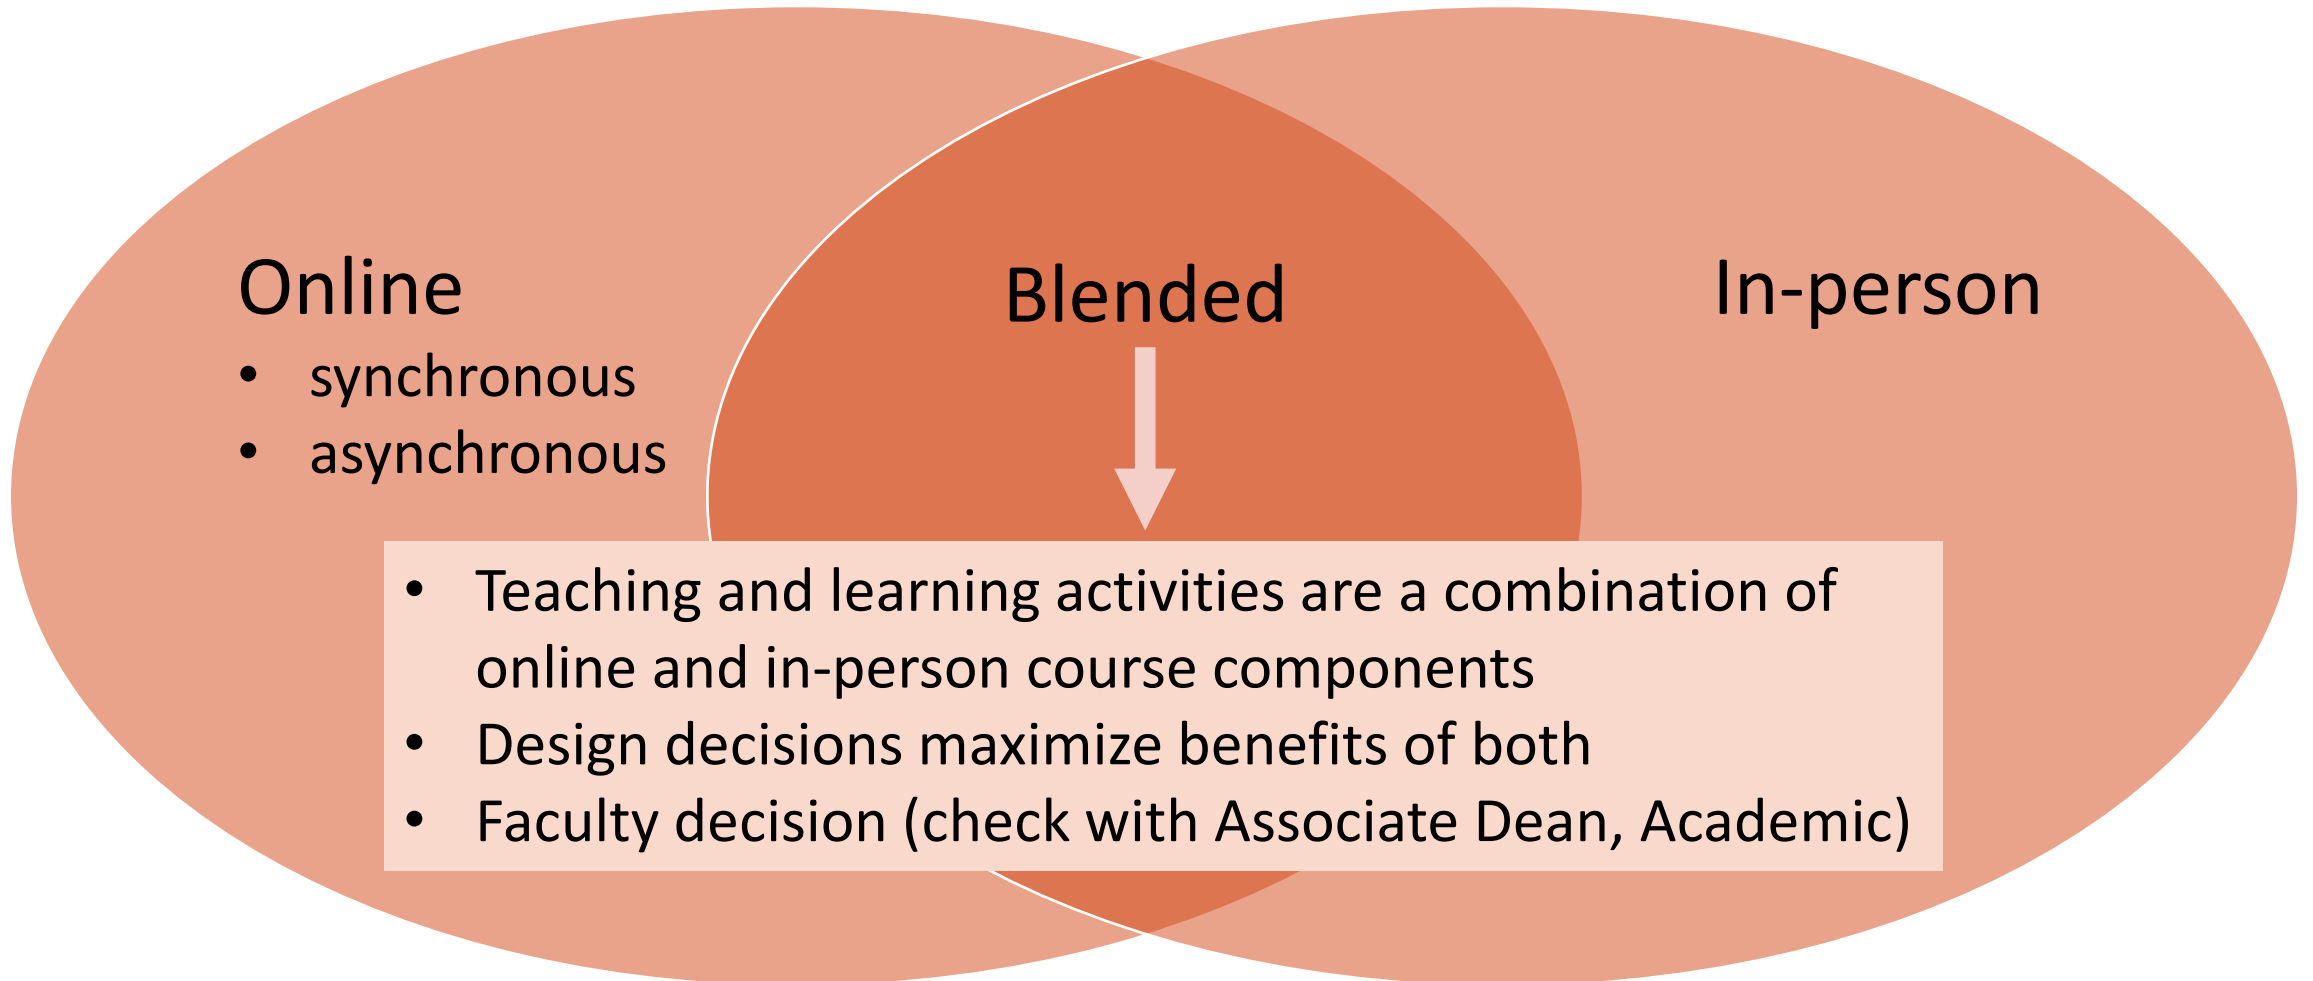

## Teaching During a Pandemic

Spring Transition, Fall Continuation, Winter Evaluation

- Many instructors made changes to their teaching and will keep them post-pandemic.
- Majority of instructors more optimistic about online learning.
- Flexibility is a key principle moving forward.

# Teaching and learning context

# Watch for a poll on your screen

---

Have you ever taught a course with a blend of online and in-person learning activities?

# Session outcomes

---

**Determine** which components of your course should be in person and which should be online

**Identify** the assessment sweet spot in your course

# Blending activities

In person

Online  
synchronous

Online  
asynchronous

# Example of blended: Prehistoric Archaeology (ANTH-201)

Objective	Activity	Activity Setting	Tools used	Assessment	Assessment Setting
Critically evaluate sources of archaeological information in popular media	Read assigned articles, watch pre-recorded lectures with feedback	Online asynchronous	myCourses Content and Quiz	1. Popular Archaeology critique midterm  2. Popular Archaeology Peer Review	1. Essay submitted via myCourses Assignments  2. Peer review submitted via peer assessment tool
	Attend a guest lecture about contemporary archaeology	Online synchronous	Zoom		
	Identify examples of archaeology in media that capture concepts from the lecture	In person	Small group discussion / whiteboards		
	Share your critique online for peer review	Online asynchronous	Peer assessment tool		

(K. Kotar, 2021)

# Example of blended

Objective	Activity	Activity Setting	Tools used	Assessment	Assessment Setting
Given Pythagorean theory, learners will design a skateboard ramp for a specific area	Read chapter, watch skateboard videos	Online asynchronous	myCourses Content	1. Develop proposal	1. Presented in person 2. Submitted via myCourses Assignments
	Solve word problems				
	Share ramp designs with peer	Online synchronous	Zoom with peer		
	Provide peer feedback on design	Online asynchronous	Peer assessment tool		
	Share final designs for feedback	In person	Classroom projector		

(Adapted from McGee & Reis, 2012, p. 12)

# Questions to guide decision-making

---

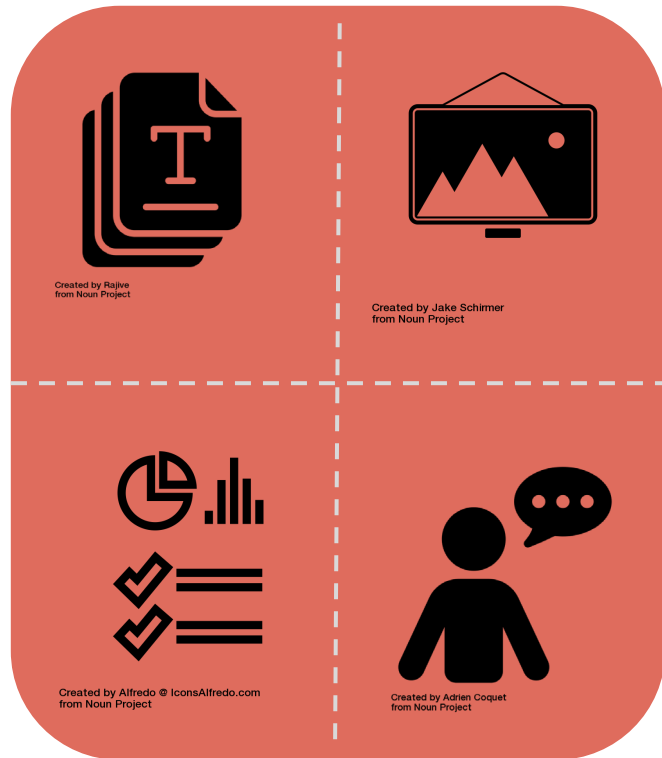

## Sound pedagogy

1. What course content is likely to generate a lot of questions and require extensive explanation?
2. Which learning activities benefit from interaction with me? With peers?

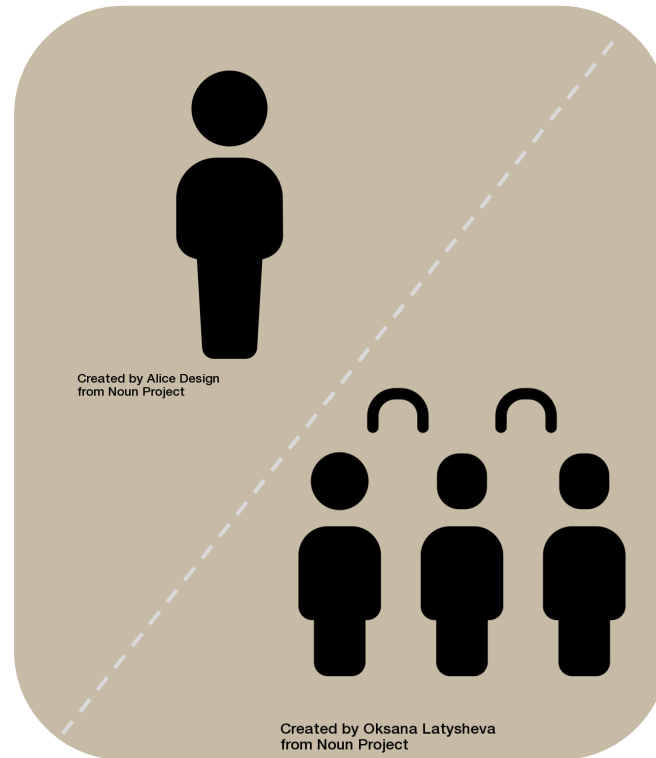

## Wellness

1. How much time do I have available to plan my course(s)?
2. How can I design a course that has a manageable workload for both my students and me?

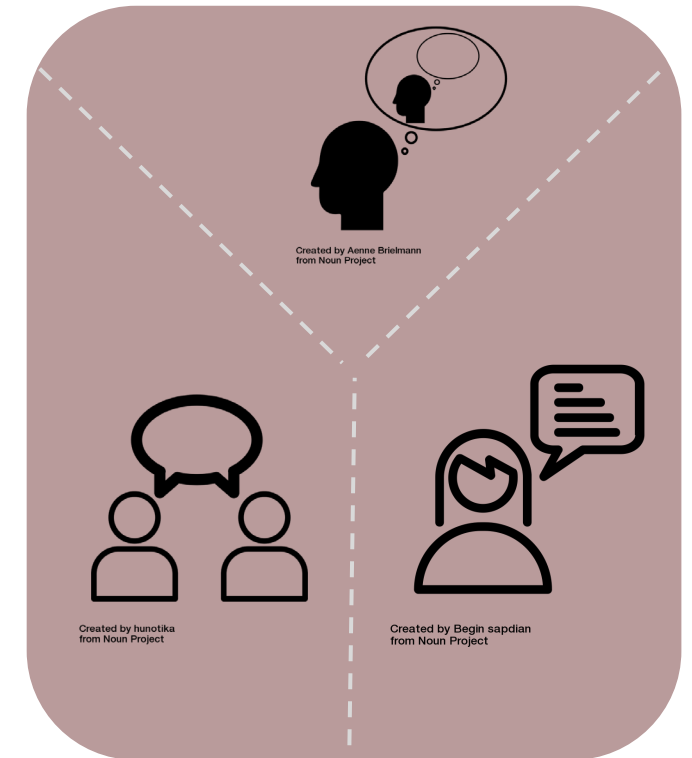

# Demonstrate learning in a variety of ways

Artifact

Interaction

Feedback  
(Assessment)

(Fenwick & Parsons, 2000; Suskie, 2018)

# Blending assessments

In person

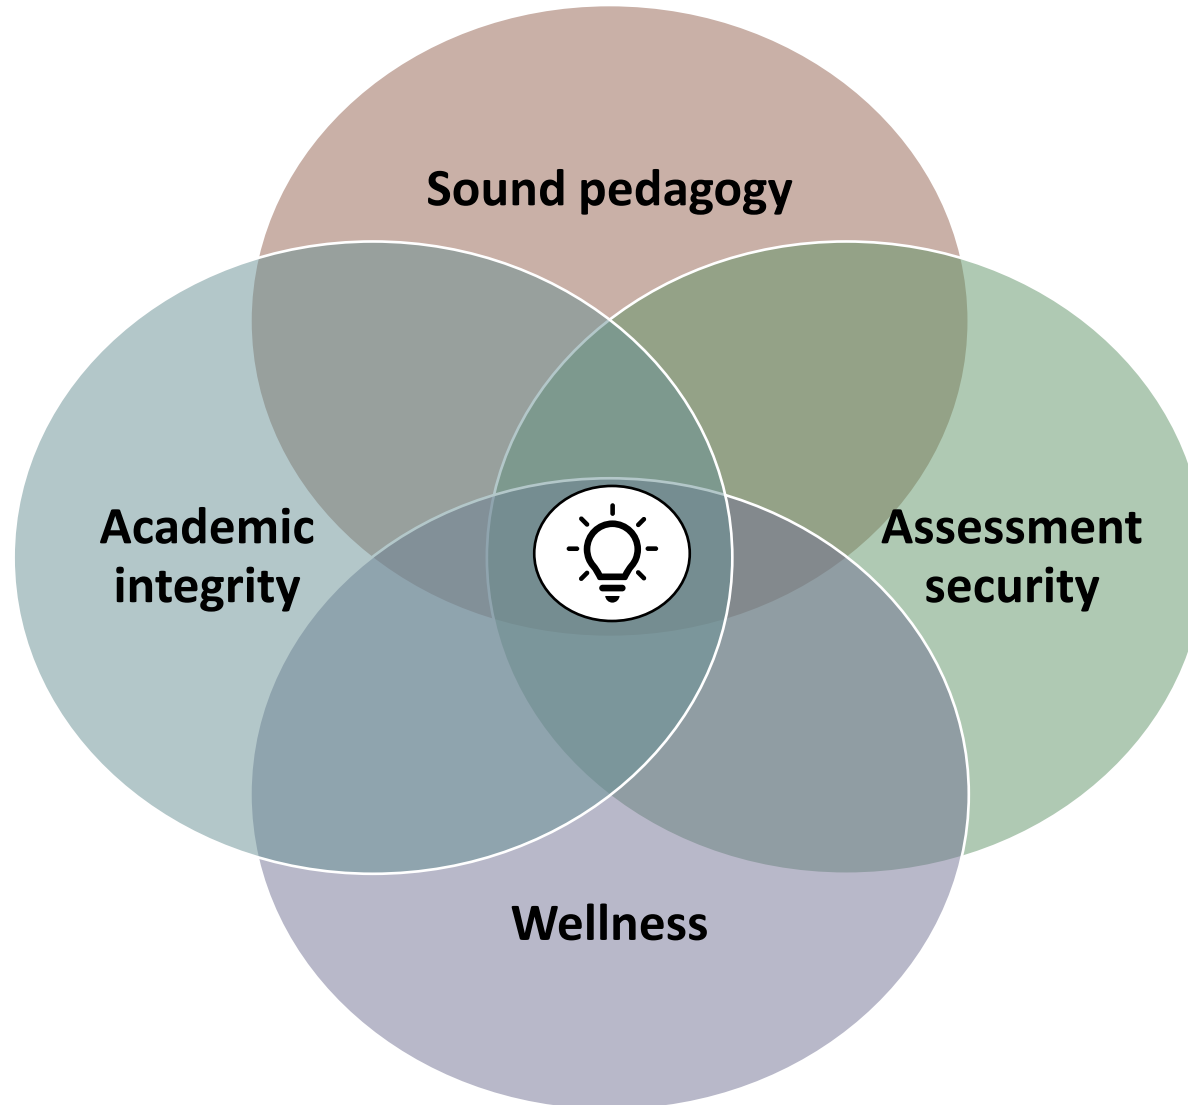

Online synchronous

Online asynchronous

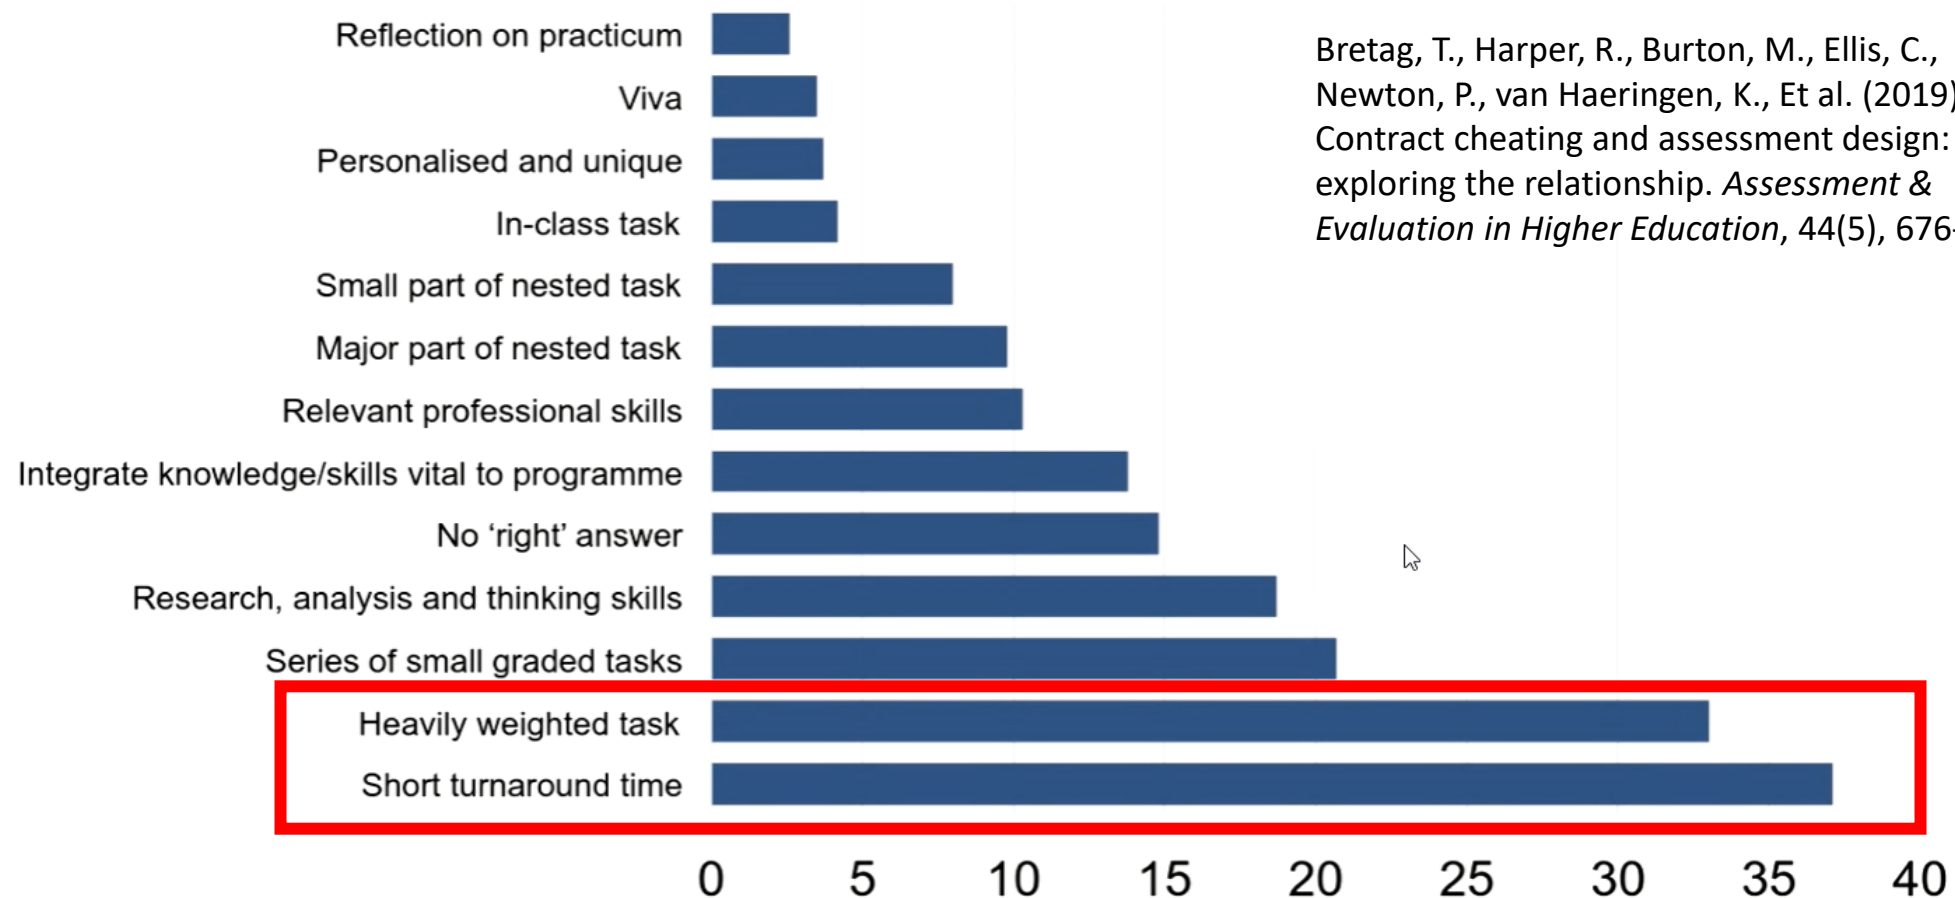

# Designing assessments: Look for the sweet spot

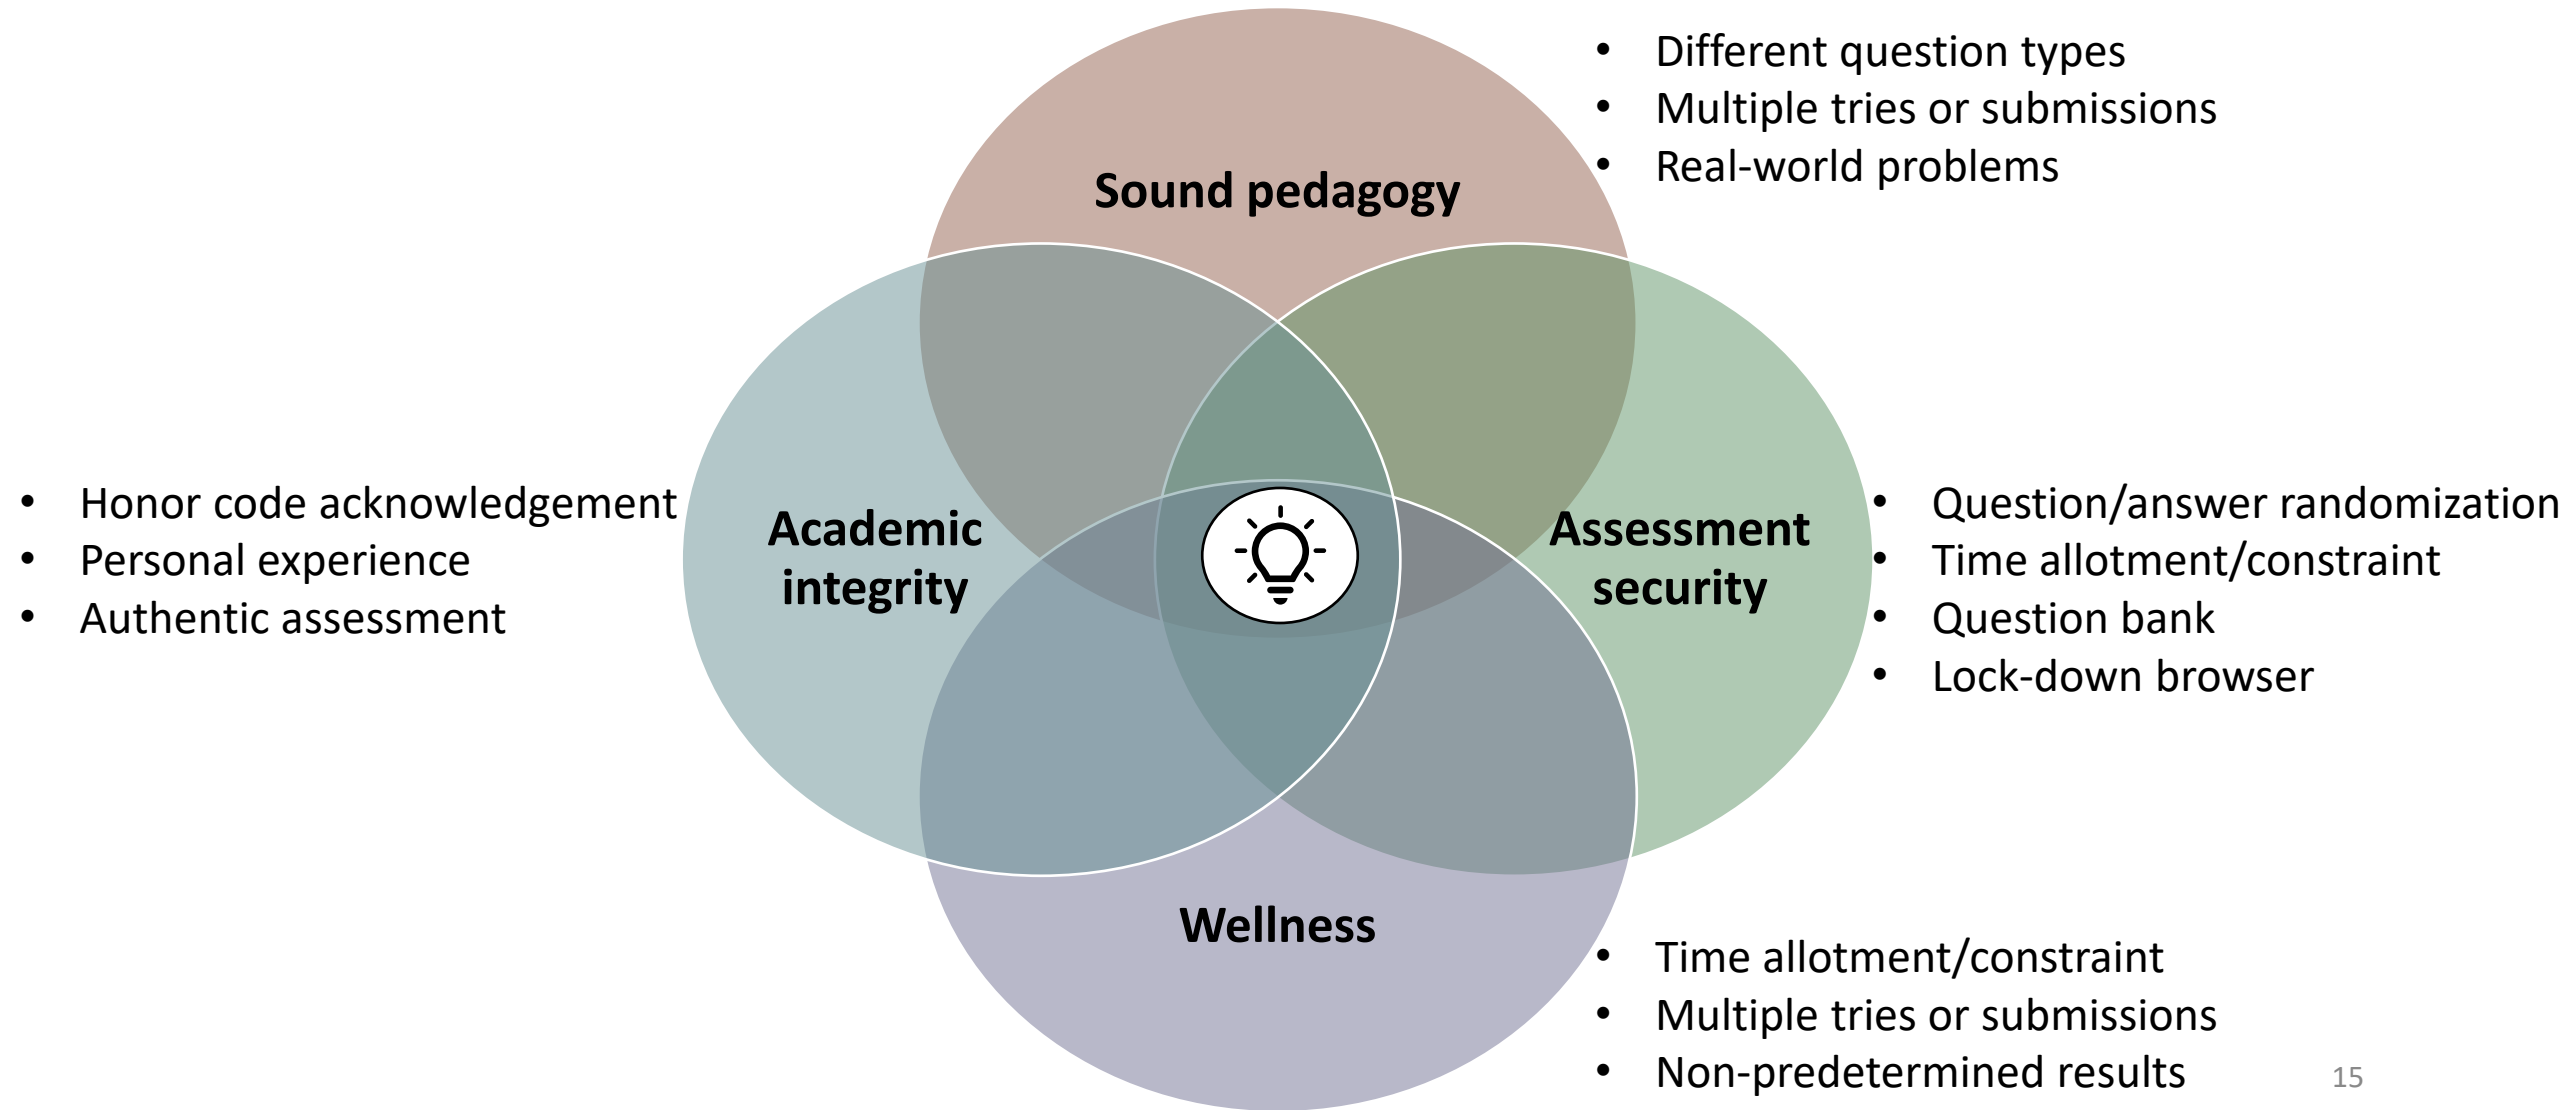

# Supporting academic integrity: Considerations

## Students' perceptions of the likelihood of contract cheating (%)

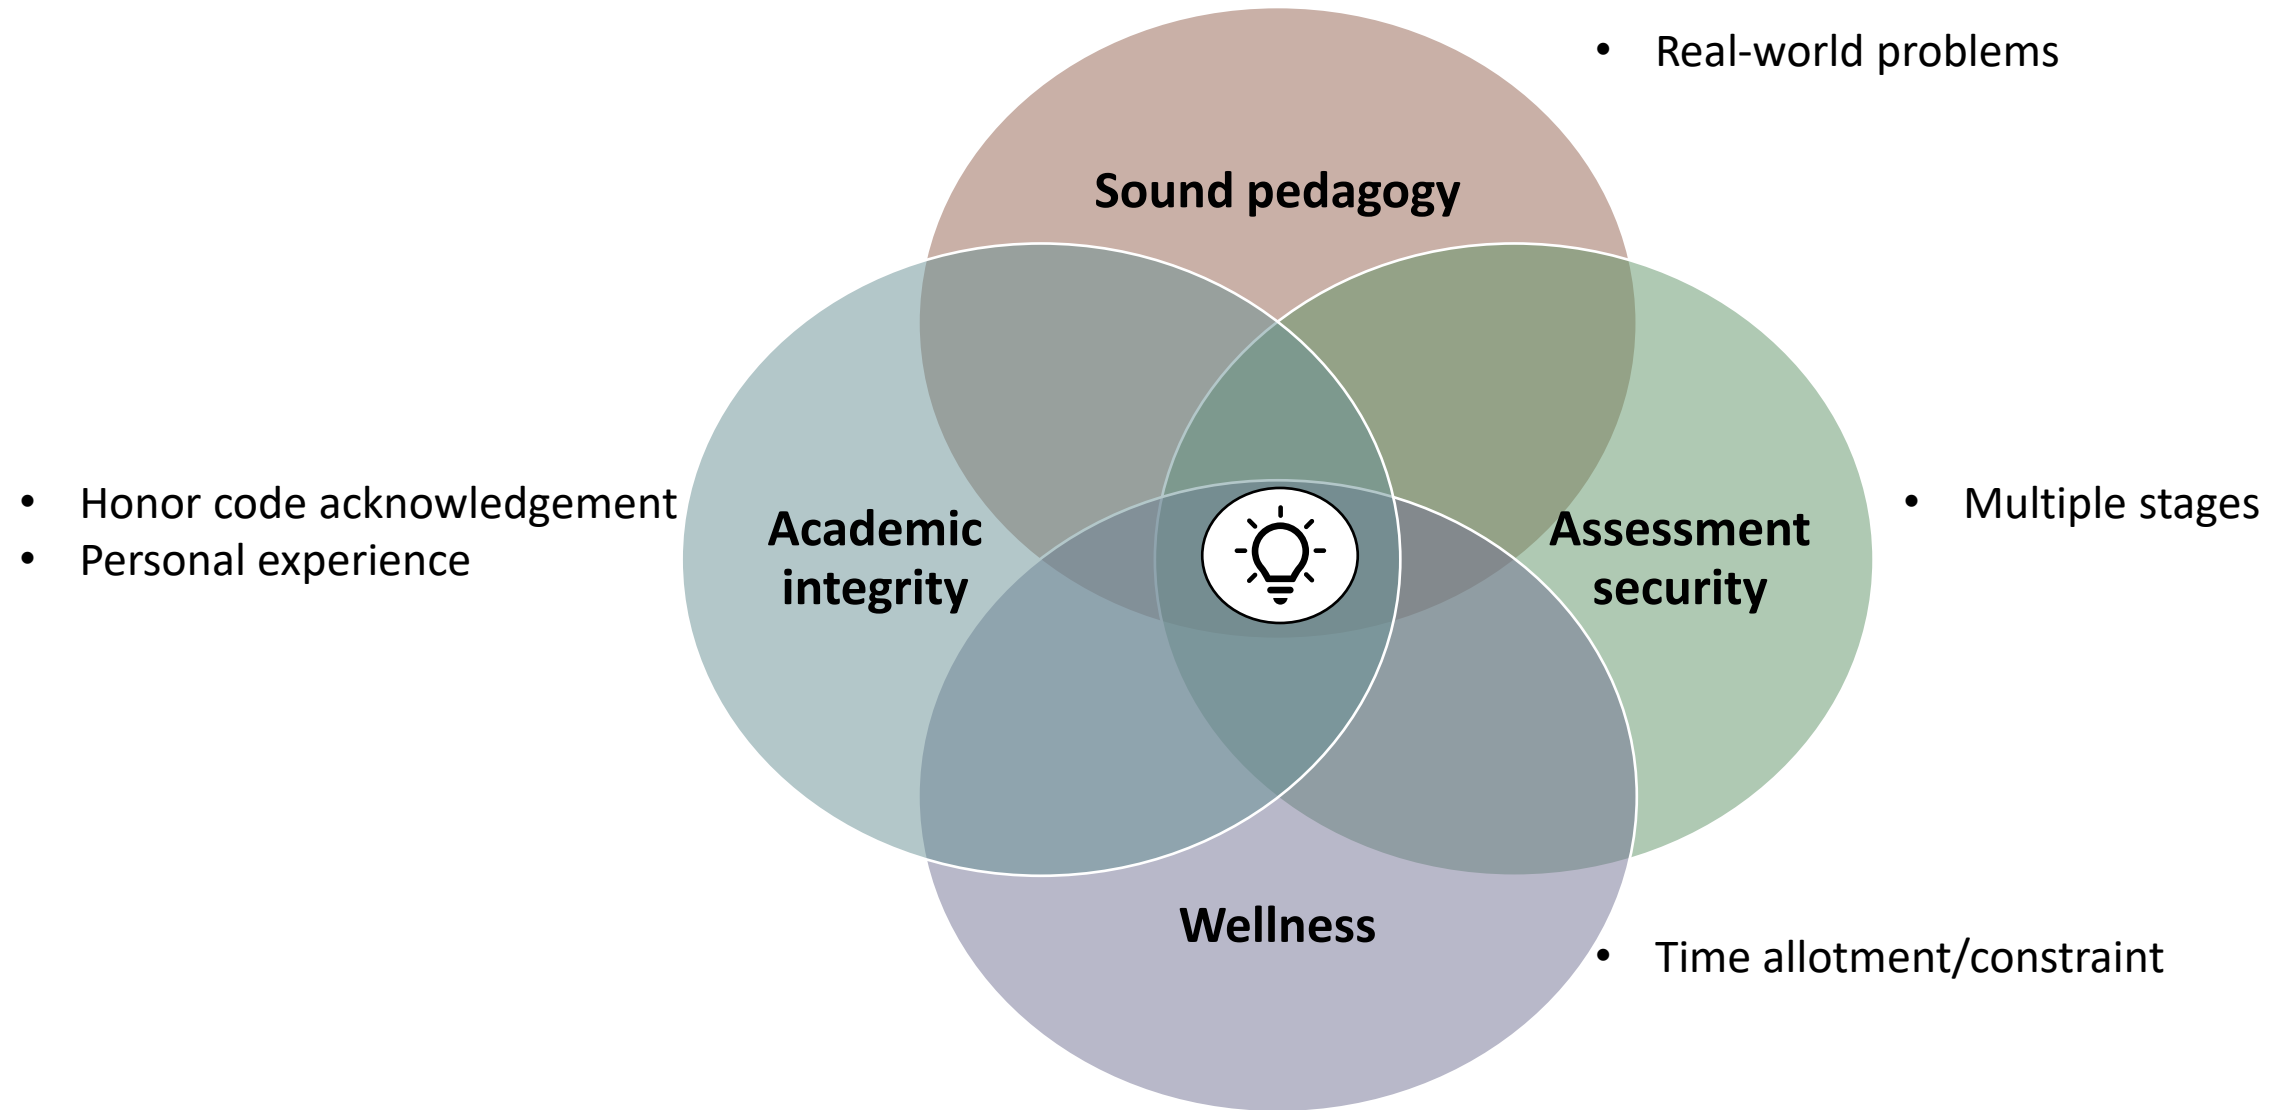

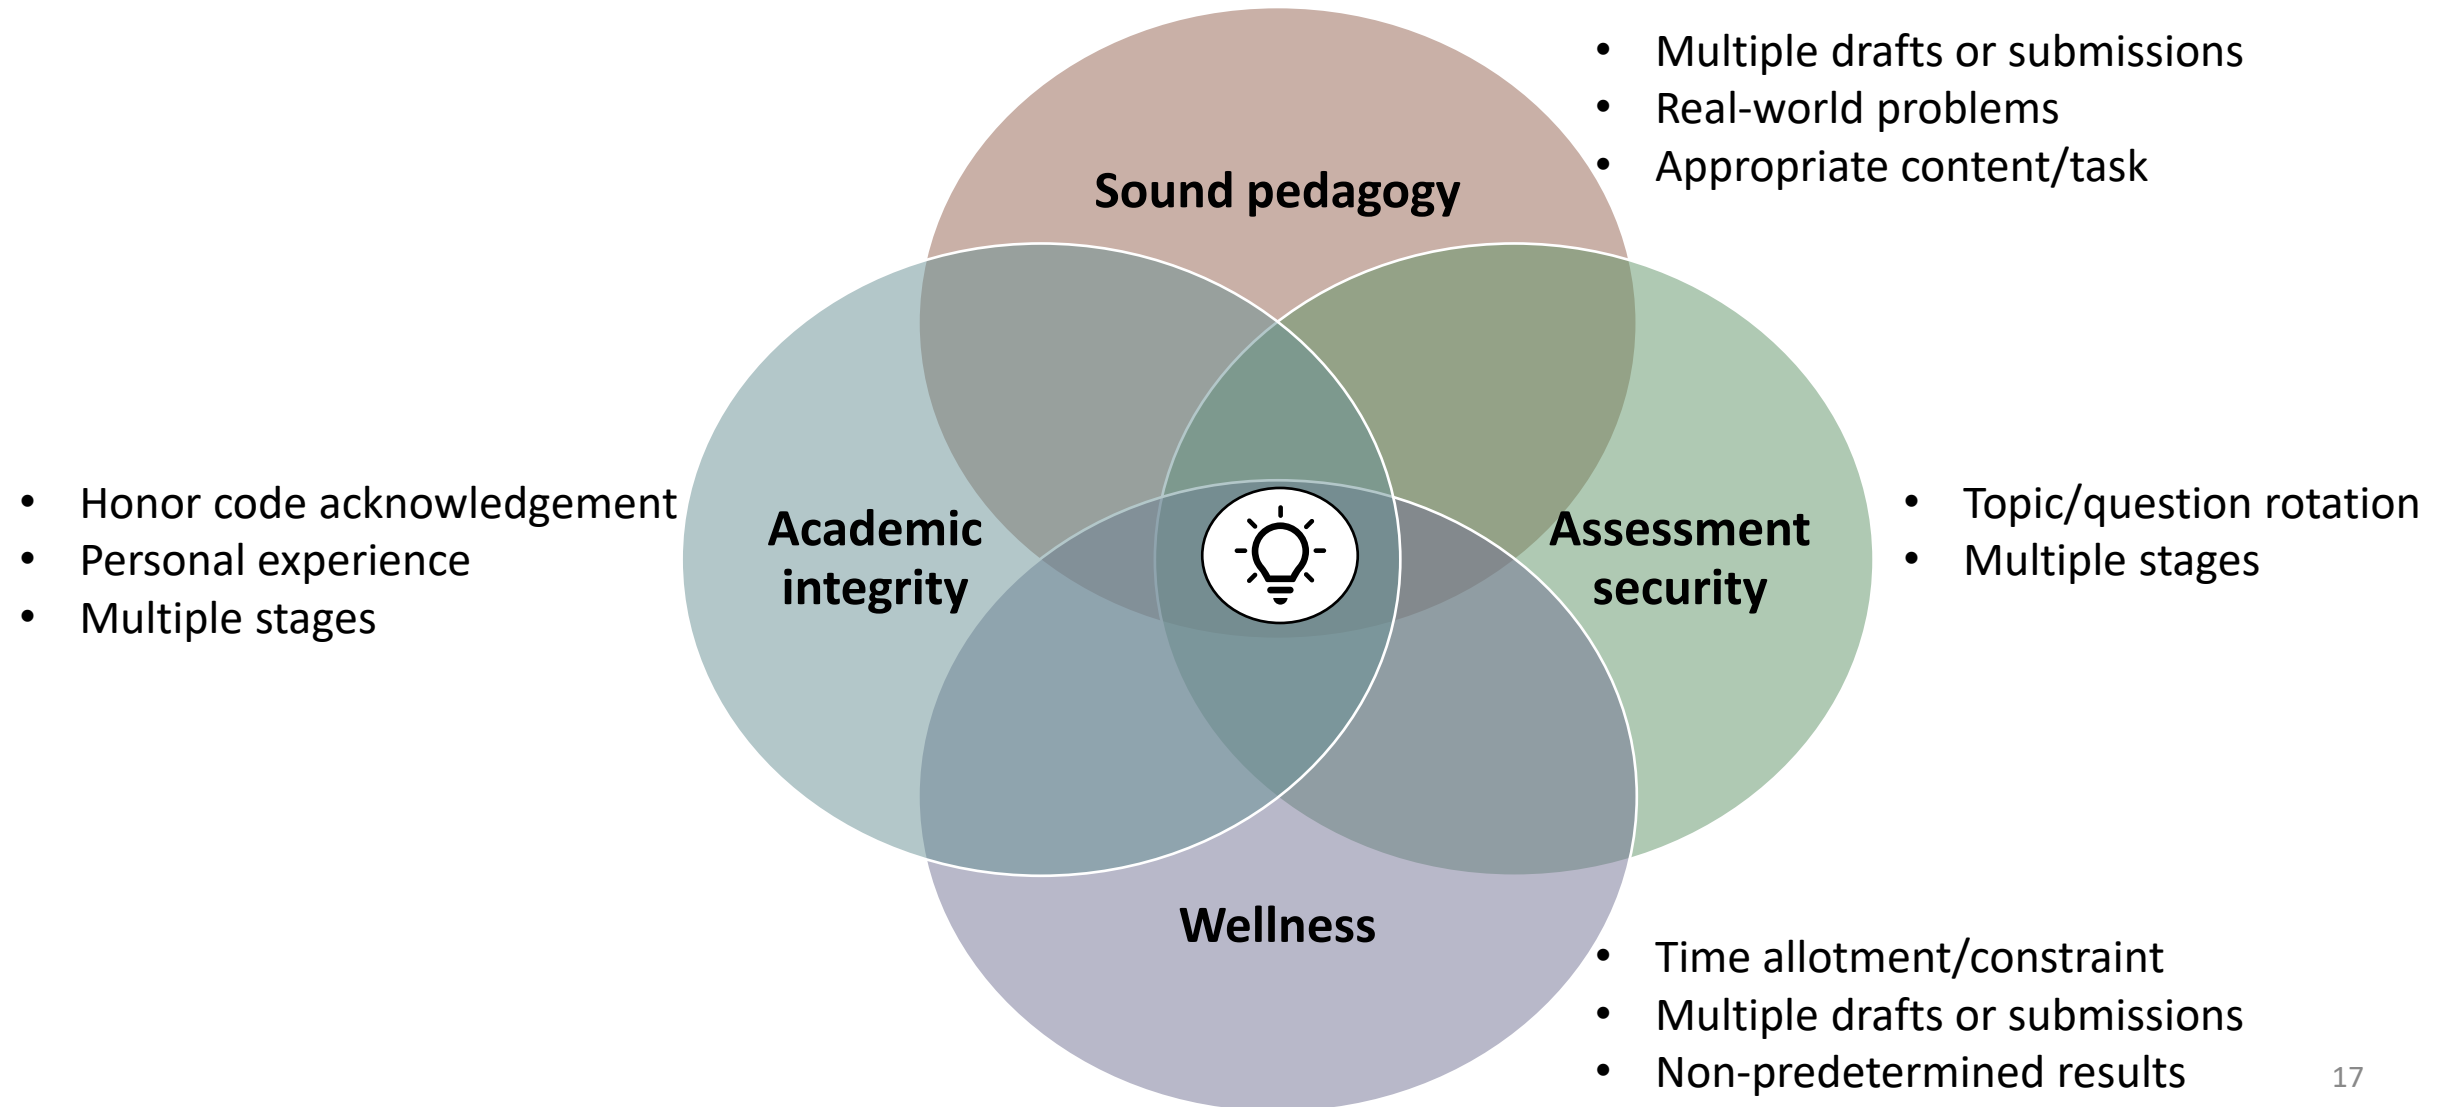

# Example: Online exam (quiz)

# Example: Essay

# Example: Essay

# Questions to guide decision-making

## Sound pedagogy

1. What course content is likely to generate a lot of questions and require extensive explanation?
2. Which learning activities benefit from interaction with me? With peers?

## Wellness

1. How much time do I have available to plan my course(s)?
2. How can I design a course that has a manageable workload for both my students and me?

## Academic integrity

1. How well do students understand what academic integrity is in my discipline and why it matters?
2. How able are students at implementing appropriate citation practices in my discipline?

## Assessment security

1. Which technology strategies (e.g., randomizing quiz/exam questions) should I consider implementing for securing assessments?
2. How can I implement a multi-stage assessment where students demonstrate knowledge/skills development over time?

# Blended learning activities and assessments planner

## EXAMPLE

Objective	Activity	Activity Setting	Tools	Assessment	Assessment Setting
Critically evaluate sources of archaeological information in popular media	Read assigned articles, watch pre-recorded lectures with feedback	Online asynchronous	myCourses Content and Quiz	1. Popular Archaeology critique midterm	1. Essay submitted via myCourses Assignments
	Attend a guest lecture about contemporary archaeology	Online synchronous	Zoom		
	Identify examples of archaeology in media that capture concepts from the lecture	In person	Small group discussion / whiteboards	2. Popular Archaeology Peer Review	2. Peer review submitted via peer assessment tool
	Share your critique online for peer review	Online asynchronous	Peer assessment tool	(K. Kotar, 2021)

# Higher ed approaches to generative AI tools

---

## Instructional

Create assessments to incorporate AI tools or make reliance on AI tools alone impossible

- How can AI writing tools be used to support learning?
- How can assessments be designed so that AI tools are not useful?
- How should citation practices change to adapt to AI tools?

## Disciplinary

Stay ahead of the technology to ask questions AI tools have a hard time answering

- How can we outwit the AI generated tools?
- Can we implement tools that can detect content that is AI generated?

---
